DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 1. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "5" has been used to designate both "flexible tube" and "fouling line", reference character "12" has been used to designate both "solenoid" and "gas distribution block". A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Longerich (United States Patent # 4,262,595). Longerich discloses a device for immobilizing a torpedo. The device comprises a housing (references 21 and 13), in the form of a capsule that is designed to be propelled from a launch tube, a fouling element (reference 16), means for automatically ejecting the fouling element from the housing, means for ensuring the fouling

element is maintained in an extended state by an inflatable member (references 28, 30 and 32) which is stowed in the housing in a deflated condition. The device further comprises a source of compressed gas (reference 36). In the inflated condition, the fouling element is disposed around the inflatable member (Figure 2A).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wright (United States Patent # 4,768,417), O'Connell (United States Patent # 5,646,366) and Grosch et al. (United States Patent # 6,303,633).
